

THE POWER TO PERFORM

THE DIFFERENCE IS IN OUR PERFORMANCE

As you would expect from a leader in the industry, J-W Power Company puts our customers first by providing a wide variety of compression services and equipment.

- We specialize in custom packages for rental or purchase.
- We perform maintenance under contract for customer-owned or leased equipment.
- We only employ service personnel who possess an excellent work ethic and a devoted customer service-oriented personality.

Performance begins with a comprehensive selection of gas compression services provided by the experienced professionals at J-W Power Company.

We understand your gas compression challenges, and we have the **Power to Perform.**

If you'd like more information about J-W Power Company's compressor solutions, contact us today.

We'll be glad to offer our assistance on your next compression project.

JW POWER COMPANY
The Power to Perform.

“Operating the largest privately-owned Compression Fleet in the United States”

COMPRESSOR LEASING PROGRAM

J-W Power Company’s robust reputation for reliable and economical natural gas compression spans over four generations. Our selection of more than **2,900 units**, ranging from 18 to 1,775 horsepower, represents the highest quality and best value lease alternative in the industry – available with and without maintenance services.

J-W Power Company specializes in leasing **reciprocating compressors** and **oil-flooded rotary screw compressors** for low-pressure applications. Customers are assured of being provided with only top quality equipment and components from proven manufacturers such as **Caterpillar, Ariel, Waukesha, Cummins, Gardner-Denver, Ajax, Gemini, Dresser-Rand** and **Sullair**.

As one of the superior lease program providers in the country, our experienced field service organization guarantees professional installation, operation and maintenance on all leased packages. We offer full-service, straight, short or long-term contracts, with or without maintenance (oil/liquids/coolants).

With over \$20-million in parts inventory and more than 30 locations to deliver prompt, efficient, dependable service, our customers have come to count on the **“J-W Power-to-Perform Package:”**

- SERVICE
- QUALITY
- SELECTION
- VALUE
- RELIABILITY

COMPRESSOR PACKAGE SALES

With over **80,000 square feet** of manufacturing space in East Texas, J-W Power Company designs compressor packages with superior three-dimensional/3-D solid model technology.

- Our designers expertly visualize the layout of the package and customize solutions before the units are even constructed.
- Our fabrication department adheres to a rigid quality control program and meets federal OSHA regulations.
- Labeled a world-class provider by satisfied customers, we have manufactured over 5,000 packages for use in our own fleet and for third parties.

“Manufacturing efficient and reliable gas compressor packages since 1976”

In addition to world-class natural gas compression packages, we design and build high-specification engineered compressor packages for a wide range of diverse applications, including:

- **Compressed Natural Gas (CNG)** for vehicle fueling stations
- **High Pressure Air Injection (HPAI)** for fireflood applications
- **Nitrogen Injection Compressors** for underbalanced drilling applications

AFTER-MARKET ASSISTANCE

• SERVICE

In addition to our celebrated compressor packages and parts inventory, J-W Power Company has earned an industry reputation for quality repair and maintenance of company-owned equipment. From **monthly inspections** and **minor repairs** to **complete package rebuilds**, we provide superior service for your company-owned packages.

• PARTS

J-W Power Company is an authorized distributor for **Ariel, Caterpillar, Waukesha, Cummins, Ajax, Murphy, Dresser-Rand, GE/Gemini** and many other top names in the industry. From our main warehouse in Longview, TX, as well as more than 30 locations nationwide, we can provide overnight delivery of parts and accessories to any domestic location.

• USED EQUIPMENT

J-W Power Company buys and sells quality used engines, frames, cylinders and all major package components, as well as complete packages. We also stock hard-to-find spare parts and equipment for older model compressors.

“For engines, compressors, cooler and ancillary parts — we’re your source for prompt, efficient supply”

COMPRESSION EQUIPMENT

Whether its compression for trailer load, pipeline injection, trailer off-load, a gas fired or electric decant system including the entire fill and off load controls required for a biogas project, J-W POWER COMPANY has the equipment solution for you.

52,000 sq.ft. Longview, TX Plant

J-W POWER COMPANY began as a deeply-rooted organization with a long standing history. A solid legacy embedded from J-W Operating Company, an all-American success story; a story of hard work, smart strategies and honest dealings.

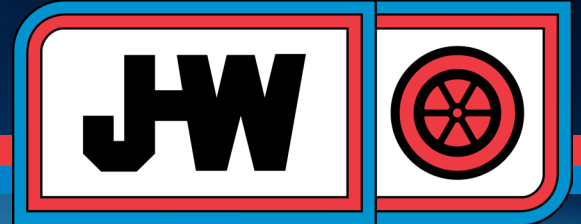

The foundation for J-W began on November 10, 1960. Involvement with gas pipelines and fascination of mechanical equipment led to interest in gas compressors and the company began purchasing gas compressors and leasing to third parties.

In the mid-70's, J-W builds a compressor fabrication plant in Longview, TX to manufacture and provide compressor facilities to the gathering systems.

J-W Power Company continues to provide natural gas compression solutions to our customers over the past 4 decades.

Our experience in engineering and packaging superior compression & gas management systems for the Oil & Gas, CNG and Biogas markets is what sets us apart from the competition.

Rely on J-W Power Company for pipeline injection, trailer fill and trailer off-load compression systems and depend on us for unparalleled service and 24/7 parts support.
